ORIGIN 1. 4. At Luban (Lauban, 12 km east of Gorlitz, Silesia), there was formerly a large "V-2" factory and plant for the manufacture of "Gollath" tunks. It was estimated that the srea covered by the factory was three square kilomaters. The buildings are of brick construction. Electric power comes from Welbraych (Madeaburg), Silesia. Some of the installations are underground. The Russians brought exports and put the factory sare underground. The Russians brought exports and put the factory 50X1-partially into commission again. b. Before the Luban (Lauban) factory resumed production, timber was allocated from its stores to the State Furniture Factory in Swidnica (Schweidnitz), Silesia. As soon however, as the "Gollath factory was placed in commission, the timber allocation was taken away. Information concerning the production of V-2's was not available. The workers are all Russians or Germans, and live in barracks and are regimented. Machine tools previously chipped to USSR are being returned. 2. a. The administration of the Ascania aircraft Parts Factory at Jelenia Cora (Birschberg), Silesia is Russian. The confiners-draughtmen are Cormans forcibly detained hare. Toles are also employed. Altogether there are about 100 persons working in this plant. The factory is making radio valves and pracision instruments such as altinature, matal valves and radio walves of the M-1, Ai, Y, Y, Y, types. Farts are conveyed by Russian or Folish trucks somewhere in the direction of Breslau after completion. Shipment take place once a week and the column numbers from thirty to forty trucks under Polish or Russian escort. b. Access to the works is guarded by a "industrial Air Force guard" under the commend of Captain Kranice, a Polo. The guards number approximately 100 men, each of whom is paid 1,200 zlotys salary a month. Workers employed in this plant are not allowed to leave and, should they manifest a desire to change their place of employment, they are threatoned with arrest and imprisonment.
